LOCAL BREFITIES.

The doc'ors report considerable malarial

fever in town at the present time. Several members of the local gun club go match there.

Anthony Lodge No. 455, F. & A. M., meets in stated communication tonight. Work in E. A. degree expected.

Chief Ray put up a rew fre alarm yesterday afternoon, extending north on Market street, from Central engine house. Prayer meeting in the Congregational church tonight instead of Wednesday, on ac-

count of the Grand Army exercises that evening. The coffin and carket company has just finished, for shipment to Capton, on special

order a berial case measuring six feet in length, three feet across at top and 23 inches in depth. The Pan Handle train ran into a cow between this city and Xenia last evening. The cow, after passing the track in front of the

crossing the track, in which she was greatly deceived; she is now dead. It is given out at Urbana that the great revivalist, Rev. Sam. Jones, will be at Urbans camp meeting next Sunday, preaching at one service, at least. Definite announcement as to this will be made later. There will be an immense attendance from all this part of the

It was reported to the police last night that E S. K-l'ey's coal office on Penn street was broken into. The thieves forced their way in through the back window, and broke the money drawer open but got nothing, as no money is kept in the drawer at night. No arrests have been made yet.

The infirmary directors have been notified that the family of Chas, Greaves are at Bainbridge in a very destitute condition, and it is claimed they are a charge upon this communivy. The husband and father was formerly a tarrier and horse clipper here, and is reported to be in the Hillsboro jail for some crime that is likely to send him up.

Xenia Gazette: "This morning Mrs. Alice Cyphord and Cyrus Stringfellow were arraigned before Mayor Trader on a charge of adultery. They plead not guilty and their trial was set for Wednesday morning at nine o'cl ck. Mrs. Cyphord and her husband had a long interview, but no compromise was effected. The husband remained firm in his determination not to take his wife back again and refused to withdraw the charge against her and Stringfell w, allowing them to go back to ja I in default of \$125 bail.'.

PERSONAL.

Mr. and Mrs. W. R. Linn left this morning for Chautauqua.

Mr. E. S. Kelley and wife leave for Chatauqua Lake this morning to spend several weeks. Miss Emma Perry, of Fort Wayne, Ind., is visiting her sister, Mrs. Dave Asken, No. 9

M'ss Lillian B. Roe, of Piqua, is the guest 183 Lagonda avenue.

Mrs. T. P. Fe:ter, who has been ill for two weeks past, is improving very rapidly, much to the gratification of her friends.

Mr. C. E. Winters and family returned last evening from Johnson's Island, near Sandu ky, where they have been sojourning for some time.

Officer Foster took Chief Schuchman out for a ride this morning, with seeming benefit to the invalid, who has become so weak that he can bear but little exercise or exertion.

Rev. F. Grumbine will preach in the Universalist church next Sunday, August 16, morning and evening. Subject in the morning: 'Sovereignty of Right." In the evening: "Sunny side of life."

Charlie Constantine was interviewed in Washington on the democratic situation in Obio and of course figured out a clean sweep for that side, basing his opinion on the strength of the prohibition vote.

Alice, infant daughter of Mr. and Mrs. R. H. Freeze, died last evening, of summer complaint. Funeral Wednesday afternoon at the house, corner of Clifton street and Cli'- ance required, the price of coal, etc. The the Champion malleable iron works.

The following party of young rociety pecple are pic-nicking on the beautiful banks of of a little more than \$2 per light per month. May Bowman, Ellen Wilson, Emma Flynn, Eva Carson, and Messrs. Ben Buxton, Frank Johnson, Et. Moreland, Jim Todd, Et. Hurd, tract. The new extension which this would Charley Rodgers and Fred Ludlow.

Rev. W. A. Falconer, D. D. of this city, Rev. W. A. Falconer, D. D., of this city, \$3,600.50, lamps at \$85 per lamp, \$4.250; delivered a sermon in Howard street Presby. and five or six miles of construction at \$500 terian church, San Francisco, Sunday even- per mile. W. A. Scott said that the company ieg. August 1, which is reported in the Chronicle of the 2nd inst. The topic was: "Lessons suggested by the life and death of General Grant." He pointed out the General's good traits as a guide to young men and spoke of him as a magnanimous victor.

A Victim of the Moving Train. A small boy named Johnny Green attempted to board the narrow-gauge as it was pulling out of Xenia last evening, and was instantly burled into eternity. He caught the hand-rail but missed his footing and fell between the cars; the next moment the which had passed over him and severed his head completely from his body. The ghastly remains were gathered up in a sheet and carried to his parents, who are of the laboring

"It is not work that kills men," says a New York editor. No; it's thicking how they may put in the longest time on the shortest job. That's what gradually saps their energies.—Courier-Journal.

THE VALUE OF LIGHT.

POINT RS OF THE PRODUCTIFE COST OF GAS AND ELECTRICITY.

The Question Before Council Tonight-Does the Gas Company Make Money?-Prices of Illumination Here and Elsewhere.

As the proposition for lighting the city

were referred back to the gas committee last Tuesday night, they will again come up for consideration at the meeting of council this evening. It is frequently asked why the city loes not manufacture its own light just as farnishes water for its own consumption and that of the citizens. In a small city, where there is no possibility of two gas companies, the manufacture of gas becomes a practical m mopoly, made so by the large investment of capital required for the plant. When the to South Solon, today, to attend the shooting complaint is made that the profits of the company are excessive it

is a very easy matter for an officer of the company to refer the grumbler to the books, which show a very reasonable dividend on the nominal amount of capital invested. But it is an open secret that the stock is "watered" for all it is worth. The proper way to guess the profits of the company is to compute from reliable data the cost of production of gas and compare it with the rate that is charged here. In last Wednesday's GLORE-RECEILED the propositions for lighting the city were printed in full, and in the same article was given the figures of Ex-Warden Thomas on the cost of producing gas

at the Ohio penttentiary. Those interested in the gas company very justly complain that the cases are not par allel because the plant here is much more expensive than these. They talk much engine, suddenly conceived the idea of reabout the cost of the plant but the papers showing the actual cost of construction were of course beyond the reporter's rench.

In an article by Charles Hull Botsford in

the current number of the North American

Review it is stated that the London gas com-

panies furnish the best quality of gas to their consumers at 70 cents per thousand cubic feet, and in some other English towns the price is as low as 30 cents per thousand Probably a fairer comparis in than this is the Theobald Forstall, president of the cured, gaining in flesh 50 lb. in a few oldest gas company in Chicago months. made the following statement in one of the Chicago papers: "This company reduced the net price of gas to \$1,00 per thousand deliberately, after ma'ure consideration, with the expectation that increased consumption and improved methods of manufacture would make this price molerately profitable. The result has fully justified our hopes and con-

firmed the wisdom of the policy adopted and this company will now make contracts to supply consumers with the best quality of gas for five years at a net price of \$1.00 per thousand feet." Compare this with the five years' proposition of the Springfield Gaslight and Coke Co. to furnish gas to consumers at \$1.65 per thousand and light the city during the dark of the moon at \$20 per post. The gas is lighted at succet (that is, the first lamp, the lighter celdom finishing his work before 9.30) and are extinguished an bour and a half before sunriee.

This, the average for the year, eight hours consumers at \$1.65 per thousand and This, the average for the year, eight hours that the gas burns per night. As the posts are equipped with four feet burners, thirty-six feet per night are burned, 13,140 feet per year. Maverick National Bank, At \$1 per thousand, the volume of the gas consume I on the "monlight plan" is \$13.14 per post, cost of care not included. But the gas men say that the plant here is more expersive because in laying the pipes they sometimes had to d lve through rock. Allowing for this, let them charge \$1.15 per thousand, and the price per post would be \$15 11 per post. Let them add 10 cents per thousand of the Misses Lou and Fannie Church, of No. | for care--which every one will admit to be a liberal allowance-making the price \$1.25, and the price per post is \$16.42. The proposition of the Gas Company for an all night, all the year 'round light is \$27 per post. By

> mately correct guess at the profits of the Gas Company can be made. The last figure in the estimate comes pretty close to the cost of gas in Dayton,

> > all the year.

On the cost of producing the electric light it is not so easy to get data from disinterested parties. Mr. J. F. Meech, superintendent of the Thompson-Houston system, stated that the average cost of producing a light of 2,000 candle power varied from \$9.38 to \$9.70 per month, depending on the amount of attendon avenue. Mr. Fre ze is superintendent at | Champion Electric Light Co. proposes to council to run 50 lights for \$6,990 per year, \$11.65 per month. This gives them a profit Mad river: Misses Mattie Steele, Alice Foley, on a plant which they say has already cost th m \$28,000, and would require \$10,000 more in order to carry out the proposed connecessitate includes a new dynamo costing \$3,600.50, lamps at \$85 per lamp, \$4.250; per file. W. A. Scott said that the company would make no money whatever on the contract and showed the reporter a private letter from the Thompson-Houston office in Boston, objecting strongly to the lowness of the bid. objecting strongly to the lowness of the bid. Attached to the companies bid is a statement showing the prices paid for the

which is \$19 per post for an all night light

electric light in a few other cities ranging from 43 8-10 cents per light per night at Dayton to 65 cents per night at New Bedford, Mass., compared with which their bid for 34 4-10 cents per night certainly

Bick Headache and relieve all the troubles incident to a bilious state of the system, such as Dis-tiness, Nansa, Drowainess, Distress after eating. Fain in the Bide, &c. While their most remark. looks very low. The question naturelly arises, why the Electric Light so desires contract from which they can make no money? A sentence in the above-mentioned private letter will probably give a clue to the answer. It is: "And we fear you will find difficulty in raising the price after this rate is once established."

The Court of Al-bama Claims, which has been in existence three years and will expire with this year, has still about 1,500 cases for

Nature Never Lies

The depleted form and furrowed countenance incontestably indicate featurity deranged ph at all conditions begotten of mental art.in, that will surely shatter the nerves and wreck the iffe of their possessor unless promptly attended to. Concealment are futile. Nature can not be successfully deceived. Furnish the wasted tissues and exhausted nerves with the nourishing aid of DUPFT's PURS MALT WHISKEY at the critical time when they need a gentle irresistible puer to grapple the malignant forces arrayed against them and the patient will rapidly recover. Hundreds, have been saved from almost certain destruction by such a course, and all the best doctors now highly recommend the treatment. All reliable drugg ats and grocers will supply it.

The Gem of the Tollet The world says is SOZODONT. It renders the teeth pearly white, gives to the breach a fragrant order, extinguishes the ill-humors which usually flow from a had and neglected set of teeth. SOZODONT is so convenient, and produces a sensation at once so de ful that it makes it a pleasure to use it.

A fairy lost a precious charm To keep the resy gams from barm,
To keep from teeth deeny and death,
To sweeten and purify the breath
Th's charm the fairy lost a mortal found,
And SOZODONT 'tis called on earthly ground'

The Doctor's Endorsement

Dr. W. D. W.ight, Cincinnati, O., sends the subjoined projectional endorsement: " have presc ibed DR. WM. HALL'S BALLAM FOR THE LUNGS in a great number of cases, and always with sucress. One case in particular was given up by several physicians who had been called in for consultation with my elf. The patient had all the symptoms of cotfi med Couramption-cold night sweats, hectic fever, barrassing coughs, etc. He commenced immediately to get better and was soon restored to his usual health. I found DR. WM. HALL'S BALSAM FOR THE LUNGS the most valuable expectorant for breaking up distressing coughs and colds.

Yates' Chance for Revenge,

FOR -Man and Beast, ----

Mustang Liniment is older than most men, and used more and more every year.

W. A. FRANCE OF NEW YORK Physician, Surgeon and Gynecologist. He makes Chronic Diseases and Diseases of the Eye and Ear a Specialty.

IT Is WELL KNOWN by all intelligent observers to 1 it is impossible for any person, no matter how largely endowed by nature or acquirements, to become thoroughly conversant with all the livisions of the Science of Medicine. Nearly all who have obtained distinction in medicine have made some special department their life work, being fitted therefor by natural adaptation or selection, special education and experience. The Doctor, having devoted several years to the special study of this class of diseases in hospital and general practice, and having the most recent and improved naturanents for finding out diseased conditions in the organs of the body, he proposes to devote the

DR. FRANCE

the organ or part affected, and the principal symptoms they experience.

And This Without Asking Questions.

He adopts the following plan, which is peculiar to the large hospitals, and is not and never has been the practice among country doctors, viz.: He carefully notes the symptoms of the patient, ascertains the condition of the internal organs, examines Eve, Ear and Throat by the most recent and improved instruments and methods, all of which he carefully records in his register for future references. In this way he ascertains the true nature of the disease and its cause. Knowing the disease, he knows the charges it produces in the issues, and, knowing the changes it produces in the issues, and, knowing the changes, he checks them with specific remarked to the charges it produces in the issues, and, knowing the changes, he checks them with specific remarked to the charges it produces in the issues, and, knowing the changes, he checks them with specific remarked to the charges it produces in the issues, and the charges it produces in the charges it produces in the charge with a state of the charges it produces in the charge it is to the charges it produces in the charge it is to the charges it produces in the charge it is to the charges it produces in the charge it is to the charges it is to the charges it produces in the charge it is to the charges it is to the charge it is to the charge it is to the charge it is made to the charge it is made to the charge it is made in an an internal charge it is made in the charge it And This Without Asking Questions.

THE REASON I TRAVEL. THE REASON I TRAVEL.

It is often asked why a physician whose ability would afford him a profitable practice at home should consent to travel. I answer: Because this method of practice is the most economical, and the only successful way a reason as the presumas of people suffering with chromic altimusts, who was the means, and the constituents have the means, and the reason as the contract of most physicians.

It reactevery mouth more than three hundred patients, whose average expense in visiting me at my house, if they had the physical strength to do so, would not be less than \$4,000 while my expenses in seeing them, at their various country seats, are less than \$800, a clear saving to patients of nearly \$4,000 per mouth. Then in the treatment of Chronic Diseases, my regular and continued visits afford me an opportunity of examining my patients and meeting the changes, also any new requirements, arising in each individual case, keeping my patients under my personal supervision, and placing within the reach of the people all the advantages of a Medical Informary right at home. personal supervision, and placing within the reach of the people and her earliered.

Infirmary right at home.

The entire cost of a complete cure under my treatment is often less than has been paid by the same person in a single year for worthless patent medicines.

The benefits this secured to the afflicted are of the highest importance, and must be apparent to the

TO YOUNG MEN. Spermatorrhoa-Its Cause and Cure. The chief causes of this disease are unnatural abuses of the sexual functions, or self-politicion, veneral excesses and weakness of the organs resulting from veneral diseases, and other difficulties affecting the urinary organs. The minds of such patients, particularly if the effection be attributed to unnatural abuse, becomes greatly depressed by an apprehension of impotency. He suffers from a sense of politicion and degradation, becomes metabody, with an aversion for society. Then follow loss of memory, duliness of the head, general nervous debility, indigestion, impurities of the blood, pinples or eruption on the face, palpitation of the heart, weakness that small of the back, loss of procreative power, nervous irritability, wasting of the frame, cough, consumption, decay and death. These are but a few of the territic consequences which follow, some or later, the victims of solitary vice, that dreadful and destructive habit which annually sweeps to an untimely grave thousands of the most talented and premising young men. Hundreds of these sufferers are to be seen in every community, who are conscious of their condition and the dangers to which they are exposed, yet are too timid to take the necessary steps to get relief. I would say to such, look at orce to your health and happiness. Belays are dangerous. Take one candid thought before it is too late. A week or month may place your case beyond the reach of nope. Waste no time with catch-pouny advertisements, or uniceraed protenders, who keep you triffing month after month, taking piosonous and injurious componies that will affect you other grave the most destinate cases and absolutely restore perfect mathematically.

To MIDDLE AGED MEN.

There are many of the age of thirty to sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, weakening the system in a manner the patient can not account for, no examination of the urinary deposits a rony sediment will be found, and sometimes small particles of altumen will appear, or the color will be of a tith or milkish hue, again changing to a dark or torpid appearance. There are many more who die of this difficulty, ignorant of the cases, which is a second stage of seminal weakness. I will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.

DISEASES OF WOMEN. The alarming number of wives, mothers and daughters who are daily suffering and sinking from diseases peculiar to their set, demand our most serious consideration and sympathy, and to relieve as far as within our reach, this dreadful scourge open American women, I have greatly increased my facilities for their medical and surgical treatment. To accommodate all who may apply to me for treatment, large additions and varied and valuable improvements have been recently made to my former outiff, and every securingly indelicate or objectionable feature that occurs ordinarily in the treatment of these cases has been removed, thus avoiding much of the unbarrassment and objections usually experienced in the treatment of this class of cases, and my increasing patronney by some of the most intelligent and refined ladies, as proof of my success, has been very marked, over two-thirds of my patients being ladies, old, young, married, single, rich and poor. My method is tree from objectionable features of the general practitioner, namely: "Local Treatment." I selden find it recessory. I prepare remedies constitutional and local, as the nature of the case demands, and instruct ladies how to treat the massives.
